
SERGIO DI MARTINO

570 Canyon Oaks Dr. Apt. H, Oakland, CA 94605 510.459.8943 sergio@webdevserg.io

SUMMARY

I am currently enrolled in UC Berkeley Extension's Full Stack program, graduating in May. I have already learned a great deal about front-end web development (HTML5, CSS3, JS/ES6), and we are now learning back-end development (Node.JS, React, MySQL, MongoDB). I expect to have a working knowledge of these technologies by graduation. I am seeking a position as a web developer. I know I still have a lot to learn, but I am learning quickly. I have developed a passion for this work, and my passion is reflected in my grade (A average). We recently completed a group project which involved combining multiple APIs in a single web app. I work well in a team setting, am an effective communicator, and I work well under pressure.
